## EDUCATION

| Degree | Specialization | Institute | Year | Marks |
|---|---|---|---|---|
| B.Tech | *Computer Science & Engineering* | SNIST | 2023-Present | 8.2 |
| HSC BIEAP | *Physics, Chemistry, & Mathematics* | SR College | 2023 | 952 |
| SSC | - | Sri Chaithanya School | 2021 | 10.0 |

## CAREER OBJECTIVE

- Computer Science undergraduate with a strong foundation in Java, Data Structures Algorithms, Operating Systems, and Object-Oriented Programming. Passionate about solving complex engineering problems, building efficient software systems, and understanding software at a deeper level. Seeking an opportunity to contribute to innovative backend and system-level development projects while leveraging AI-assisted development tools to enhance productivity, learning, and software quality.

## PROJECTS

- **RealTime Collaborative code editor** *Mar 26 - Apr 26*
  - Real-Time Collaborative Code Editor is a web-based platform that enables multiple users to write, edit, and review code simultaneously in a shared workspace. The system provides instant synchronization of code changes, allowing team members to collaborate efficiently regardless of their location. It includes features such as live editing, user authentication, syntax highlighting, chat functionality, and version management to enhance the coding experience. This project is designed to improve teamwork, streamline code development, and support collaborative learning and software development environments

- **License-Plate-Recognition** *Jul 26 - Aug 26*
  - License Plate Recognition Systems use the concept of optical character recognition to read the characters on a vehicle license plate. In other words, LPR takes the image of a vehicle as the input and outputs the characters written on its license plate. Can you imagine how invaluable this would be to your undercover/detective skills? You can pull off all the necessary details about a car from the license plate characters.

- **MACHINE LEARNING-BASED WILDLIFE SPECIES CLASSIFICATION FOR BIODIVERSITY CONSERVATION** *Mar 26 - Apr 26*
  - This project presents an advanced deep learning framework for automated wildlife species classification with a strong focus on b-iodiversity conservation. Traditional manual classification of camera-trap data is time-consuming and inefficient. To address this, we use a lightweight MobileNetV2-based transfer learning model for accurate species identification.

## CERTIFICATION

- **Certificate of Proficiency** : Successfully Completed a 5-months intensive training program in Artifical Intelengence and Machine Learning conduected by -Data,IIIT HYD from May to September 2025.

- **Fundamentals of Machine Learning and Artifical Intelligence** ,Issued by AWS Training and Certification

- **Tata Data Visualisation: Empowering Business with Effective Insights Job Simulation on Forage** :
  - Completed a simulation involving creating data visualizations for Tata Consultancy Services
  - Prepared questions for a meeting with client senior leadership
  - Created visuals for data analysis to help executives with effective decision making

- **Data Analytics Job Simulation :**
    - Completed a Deloitte job simulation involving data analysis and forensic technology
    - Created a data dashboard using Tableau
    - Used Excel to classify data and draw business conclusions

## POSITIONS OF RESPONSIBILITY

- **Organising Executive** *[Tech Vision Club]* *Feb 26 - Present*
    - **As an Organizing Executive, I am responsible for planning, coordinating, and executing club activities, events, and programs. I work closely with club leaders and team members to ensure the smooth management of events and the successful implementation of club initiatives. My responsibilities include scheduling meetings, managing logistics, coordinating with different departments, handling registrations, and supporting event promotions. I also help maintain effective communication among team members, address operational challenges, and ensure that all activities are carried out efficiently while aligning with the club's goals and objectives.**

## TECHNICAL SKILLS

- **Languages:** Python, C, JAVA, JavaScript, MySQL, HTML 5 , CSS
- **Tools:** GitHub, VS Code , Claude,REST API
- **Skills:**DSA,Financial Analyst Course,Spring Boot,Data Visualisation,Data Analytics,Machine Learning
